Pepperdata Free Cost Optimization Evaluation
Save Real Money Running Your Spark Applications on Amazon EKS

Experience how Pepperdata Capacity Optimizer automatically optimizes and improves your efficiency by eliminating waste in real time from your running Spark applications.

Pepperdata Free Cost Optimization Evaluation Benefits:

- **Reduce the cost of running your Amazon EKS environment by up to 25%**
- **Pepperdata operates autonomously and continuously in the background** with no change to your application code.
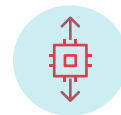

Pepperdata Advantages:

- **No code changes**
- **No platform config changes**
- **No advance workload profiling required**
- **Integrates easily into existing automation frameworks**

How the Evaluation Works:

Step 1: Install Pepperdata: ~60 minutes
Pepperdata is installed in your environment.

Step 2: Run Pepperdata: ~5 days
Run your workloads as normal. Pepperdata will go to work immediately reducing the waste in your Spark environment, improving utilization and saving you money.

Step 3: Review Results: ~60 minutes
Meet with Pepperdata Architect to review your cost savings data, utilization data, and ROI data.

Get started saving today with a **free, 5-day, no-risk evaluation** of Pepperdata to reduce inefficiencies in your Amazon EKS environment.
